EVOLUTION

Independent Living

The heartbeat of home care

PEOPLE HAVE A DESIRE TO REMAIN INDEPENDENT IN THEIR OWN HOMES. FORTUNATELY, THIS IS OFTEN THE LEAST EXPENSIVE ALTERNATIVE. A BIT OF TECHNOLOGY CAN PROVIDE A SAFER AND HEALTHIER ENVIRONMENT.

Independent Living With Home Automation

Home automation is a comprehensive term which describes any combination of residential sub-systems working together. Sub-systems include lighting, blinds, security, audio, phone, heating/cooling, data network, video, irrigation, home theater, etc.

Independent seniors can benefit greatly from home automation integration:

- **One Touch Goodnight:** A single button turns off the TV, shuts off all indoor lighting, arms the security system, sounds an alert if the garage is open, turns on outdoor security lights and adjusts thermostat to night mode.
- **Automatic Mute:** Mute the whole-house audio when the phone rings, preventing undue stress and injury.
- **Caregiver Entry Control:** Provide security code which only works during certain hours/days and records In/Out times.
- **Coordinated Window and Thermostat:** A/C turns off when any window is opened, and turns itself back on when windows are closed.
- **Phone Scam Alert:** Voice announcements or TV/monitor displays warn senior not to answer when the caller is unknown.
- **Control Everything:** Program keypads to operate nearly any device, such as a fire-place, fans, motorized window curtains, or an audio system.

Automated Lighting

Automated lighting is a type of home automation ideal for Independent Living. A central controller operates indoor and outdoor lights for your home, providing increased security, safety, energy savings, and convenience to any home.

Lighting control systems are designed for installation in existing homes, new construction, rental units or anywhere in between. Independent seniors can enjoy the following benefits:

- Pathways of light appear when rising from bed. Move safely and effortlessly from the bedroom to bathroom to kitchen.
- One button turns off all lights at night, or all lights on in an emergency.
- Lights can turn on automatically if the security system detects an intruder, or flash to make the home easier for police to find.
- Smoke alarm can trigger dimmed lights, to optimize visibility in smoke-filled rooms.
- As the resident leaves for the day, one button turns off all lights, arms the security system and adjusts the thermostat to save energy.
- Simulate a lived-in look for evenings nobody is home.
- Lights turn on automatically as you enter a room, with dimming appropriate for the time of day.
- Lights turn off automatically when a room is not in use.
- Lights can flash to signal the doorbell or phone ringing.
- One button at a stairway turns off all upstairs or all downstairs lighting.

GrandCare Systems

CREATING A CARE TRIANGLE AMONG INDEPENDENT SENIORS, THEIR FAMILIES & CARE PARTNERS. GRANDCARE SYSTEMS PROVIDE PEACE OF MIND FOR ACTIVE SENIORS & A CONNECTION TO FAMILY & FRIENDS.

GrandCare offers the most feature-packed wellness and communication system on the market today. It combines aspects of smart home, online communications, and healthcare in one flexible, user-friendly and affordable package.

GrandCare is a touchscreen placed in the loved one's home. The system provides access to news, weather, pictures, email, reminders and more with the touch of a finger. They can also play games, search the Internet, listen to music and other interactive activities to improve their cognitive mind.

When a loved one's condition requires enhanced attention, you can activate the activity and wellness features. The unit communicates with a wide range of small sensors, which monitors activities of daily living. Monitor door openings, motion

and activities, medications, wake-ups and more. The system can then be accessed by family and caregivers using the web-based interface to assess the wellness and safety of the loved one. The system can also be instructed to send an alert email, text message or phone call to caregivers if something is amiss.

Wellness devices keep a valuable record of health vitals.

GrandCare is customizable, expandable and moderately priced. It is professionally installed with little or no new wires, and seniors need no technical or computer expertise to use GrandCare!

- Simple to set up and easy to use.
- Customized to fit any individual's needs.
- Flexible and expandable.
- Low-cost option for independent living.
- No technical expertise required!

What Steps Have You Taken To Make Your Home Safer?

REMAIN INDEPENDENT

- Stay longer in your own home with improved safety and security.
- Enjoy all the benefits of the Internet with no technical know-how required.
- Improve memory with interactive games.
- Have the system remind you of birthdays, anniversaries, events and daily activities.
- Stay current on important events with a family calendar and messages.
- Improve your health with easy management of chronic conditions.
- Keep track of health and wellness.

BENEFITS FOR THE ENTIRE FAMILY

- Save money by avoiding or delaying the need for more supervised care.
- Keep the family connected with pictures, messages, video conferencing, emails and more.
- Make informed decisions on level of care with better assessment information.
- Save money by using services only when you really need them.
- And much more!

CAREGIVER OPTIONS

Residents receive personalized service and care facilities run more efficiently with GrandCare. It's an inexpensive system to monitor activity and wellness of residents without compromising their dignity.

Managing a senior care facility requires top-notch service at a cost residents can afford. Service is a delicate balance between providing quality assistance and respecting independence.

GrandCare decreases operating costs while maintaining quality service. Residents receive enhanced services, facilities run efficiently, and less time is spent on tedious administrative work.

RESIDENT OPTIONS

With a Trillium for each resident, take advantage of ADL alerts and continual communication.

Or provide a communal location for residents to play games, take readings and more with a Kiosk.

STAFF OPTION

With the portable Trillibit, travel from room to room to collect vitals and record care notes.

Listening Devices

WE OFFER A COLLECTION OF CUTTING-EDGE ASSISTIVE LISTENING DEVICES FOR INDIVIDUALS EXPERIENCING MILD-TO-MODERATE HEARING LOSS.

FreedomTalk Amplified Phone

This phone helps you overcome hearing and vision challenges. Caller ID announces the number in a clear voice and displays it on a large backlit screen. Need to be sure you're dialing correctly? An oversized, talking keypad confirms each key you press. The system features eight photo dial buttons, so you don't even need to know the numbers of your friends and relatives. Just press a familiar face.

If you want to be sure you don't miss your messages, the system's simple digital answering machine functionality makes message playback loud and clear.

CLCSC1000

Krown Amplified Ringer with Strobe

The Krown Ringer with Strobe monitors a telephone line for incoming calls and flashes the bright strobe light to alert the hearing impaired that the phone is ringing.

- Extended louder ringer up to 120dB

KMRA05

PowerTel Amplified Phone Combo Kit

Ideal for those who enjoy the convenience of having a corded and cordless telephone. Both telephones are amplified with programmable buttons. It features an integrated answering machine and large display.

AM92445

PowerTel Wireless Wrist Shaker

The PowerTel Wrist Shaker can be used with Amplicom PowerTel phones and vibrates in the event of an incoming call

- Visual LED call signaling
- Up to 50 hours charge in standby mode

AM93343

More Digital Home Health Products Available Online

ClearDigital Amplified Cell Phone

This is the mobile phone you've been searching for. The ClearDigital Amplified Cell Phone offers not only amplification to increase the loudness of the sound, it also offers frequency control. Frequency control allows you to adjust the tone (sometimes referred to as pitch) of the call.

This creates both loud and clear sound.

The simple design, large 1/2" buttons and large, bright backlit screen make every call a breeze. No more frustration with the complexities of today's smart phones. When you are looking for a simple phone that offers terrific sound quality, simple functionality and large buttons - the ClearDigital GSM Cell Phone is the answer.

GSM unlocked handset works on the T-Mobile, & AT&T network (activation required but not included).

CLCSAC100

Presto Printing Mailbox

While most seniors prefer to stay in their own home as they age, loneliness can be an issue. And if they are among the 58% of adults over 65 who don't go online, keeping in touch with family and friends can be difficult. With Presto computerless email, seniors can receive email, digital photos, and other documents without the hassle and expense of a computer or Internet connection.

HOW IT WORKS

Anyone on the approved senders list simply sends email just like they would to anyone else. Presto transforms the messages into beautiful, easy-to-read e-letters, and prepares them for delivery. Up to five times per day, on a schedule you choose, the Printing Mailbox dials into the Presto service to check for messages. If there are messages, they are automatically printed. There is nothing the senior needs to do- no mail program to log on to, no attachments to download- they don't even need to push a button. They simply pick up the automatically printed messages, read and enjoy!

- No spam
- No computer or Internet needed
- Connects to the existing analog phone line
- No toll charges
- Selection of puzzles and articles available

PRESTOPM10

A subscription to the Presto Mail service is required.

Door Intercoms

DOOR INTERCOMS OFFER AN EXTRA LEVEL OF SECURITY FOR THOSE LIVING INDEPENDENTLY, WHILE PROVIDING COMMUNICATION CONVENIENCES FOR YOU, YOUR FAMILY AND YOUR FRIENDS.

Wireless Intercom Kit

Use your existing doorbell to connect an intercom doorbox and communicate to an interior intercom module via the existing electrical powerline in your home.

- Expandable up to 4 stations.

WHDB301

Extra Outdoor Doorbell/Intercom Box

WHDB300

DoorBell Fon Door Answering

The DoorBell Fon replaces a regular doorbell to let you answer the door from any phone. When a visitor presses the button on the doorbox, you greet them by simply picking up the phone.

ACDP28WT

Also available in Ivory, Brass, Aluminum, Bronze and Black (prices may vary).

BRINNO PEEPHOLE VIEWER

The Brinno PeepHole Viewer uses an LCD Panel and a PeepHole to display who is at your door. It turns your hard to see PeepHole image into a big bright image. Now its easy to avoid unwanted solicitors or your nosey next door neighbor without alerting them that you're at home!

- Simple one button operation
- Press the Power button under the LCD panel to turn on the viewer and see clearly who's at the door.
- The first push of the Power button will put the PeepHole Viewer into "Regular"

view mode; If the button is pressed a second time while the viewer is still on, the display will go into "Zoomed View."

PSPHV132512

BIG BUTTON REMOTE

A stylish yet functional design features large tactile friendly buttons, and full function labels for easy use. The set up locks to prevent reprogramming the TV.

FLA22V1

TV Ears

TV Ears manufactures doctor-recommended TV listening solutions. These solutions have helped over 1,000,000 people hear the television clearly and once again enjoy what they are watching bringing families back together.

The 2.3 system works with Plasma and LCD flat screen TVs, even in the presence of fluorescent lighting. This system covers up to 600 sq. ft.

TV Ears Tips provide an acoustically sealed chamber that reduces room noise and provides comfort and clarity for outstanding word

discrimination so that TV dialog is clear and understandable.

TV10341

Windows & Doors

THESE SYSTEMS GIVE COMPLETE INDEPENDENCE TO OPEN AND CLOSE DRAPERIES, DOORS, WINDOWS, SKYLIGHTS AND MORE. IDEAL FOR BOTH YOUNG AND OLD LIVING WITH PHYSICAL DISABILITIES.

Add-A-Motor Drapery

New feature permits hardwire connection to third-party devices that have timer controlled dry contact relays. These controllers can open and close drapery on a time schedule. Motor can also be controlled by IR emitter, and learning remote control.

Independence & Security

Sentry Window System

A low profile design and quiet motor are two of the exciting and powerful features engineered into this new motorized system. Includes motor, controller, rain sensor and hardware.

TR43510005

Vega Window System

The UCS Vega Motor System Provides 12-inch chain operation for skylights and awning or hopper windows. Can be installed on top-opening or bottom-opening windows.

UC40902M

BIOREADER KEYPAD

The Napco BioReader Digital Keypad is ideal for those with mild to acute cases of arthritis. No need to keys - you can open the door by entering a code on the numeric keypad or by using your finger.

NPBIOREADERMS

Open Sesame Automatic Door Opener

At the touch of a button, the Open Sesame automatic door opener gives complete independence to enter and exit home.

This professional grade disabled access system unlatches a locked door, then opens, pauses and closes it - all automatically.

This remote controlled door opener can be operated with a variety of wheelchair mounted remote controls, wall push pads and other specialty controls customized to accommodate almost any physical disability.

OSRSPD

Includes everything you need.

PROXIMITY READER

Access your home with a proximity card. Simple installation, quick programming, high reliability, and great looks are all combined in this Stand-Alone Proximity Reader. Includes 10 cards.

SEPR112SA

Emergency Care

SilverCare

SilverPlus has advanced personal safety and wellness to a higher level with the SilverCare Personal Safety Alert Devices.

SilverCare goes beyond a personal emergency response system (PERS) or medical alert device for the elderly; it acts as a 911 alert, allows priority help contact, medication and appointment reminders,

stores In Case of Emergency (ICE) data and more.

SilverCare combines advanced technology with timeless style. Its elegant, compact, water-resistant design fits anyone's active lifestyle. Plus, there are no monthly fees!

SIHC100KP

Base unit and pendant.

SIHC100KW

Base unit and wrist-watch.

THE PERSONAL EMERGENCY RESPONSE SYSTEMS (PERS) FROM LOGICMARK ARE THE WORLD'S SMALLEST 2-WAY VOICE EMERGENCY PENDANT COMMUNICATORS THAT PROVIDE COMPLETE COVERAGE.

FreedomAlert

FreedomAlert is your personal link to family, friends or caregivers. FreedomAlert allows you to program up to four phone numbers to be reached at the push of a button.

LM35911

FreedomAlert and GuardianAlert 911 require no activation, no contracts and no monthly fees.

GuardianAlert 911

Talk Directly through your GuardianAlert pendant to a 911 operator at the push of a button.

The system can operate anywhere in and around the home!

LM30911

LifeSentry

LifeSentry is the ultimate PERS. LifeSentry allows you to communicate your message instantly from within many hundreds of feet.

LifeSentry is a professionally-installed model, and calls a central station (additional service fees may apply).

LM37911

Linear PERS-3600B

Linear's Newest Wireless Emergency Reporting Console! The PERS-3600B Personal Emergency Response System connects to a telephone line and automatically places a call for help whenever assistance is needed, any time of the day or night. The table-top console provides "pushbutton" emergency assistance to anyone who desires additional security and peace of mind.

The Console's emergency alarm can be triggered by the large, easy to find, help button on the top of the Console or by using a wireless wristband or pendant transmitter. For the visually impaired, each button on the Console is molded with braille characters to identify the button's function. The Console can also function as a fire alarm triggered by compatible wireless smoke detectors.

LNPERSKIT5B

Includes Console, Wristband Transmitter, Cords & Power

LNPERSKIT3B

Includes Console, Pendant Transmitter, Cords & Power

The PERS-3600B supports multiple transmitters. Ask for details!

MYHALO IS

THE FIRST MEDICAL ALARM THAT SENDS AN AUTOMATIC ALERT IN THE EVENT OF A FALL - NO NEED TO PUSH A BUTTON!

myHalo Fall Detection

While most medical alarms are only able to react to an emergency, myHalo is the first system of its kind to provide 24/7 activity and health monitoring.

The myHalo Clip is designed for seniors (or other home health patients) and their Caregivers. It is much more than just a panic button worn for emergency situations. The advanced technology and reliability built into the myHalo Clip allows myHalo users who are temporarily unable to call for help to still be protected.

- Advanced fall detection and alerts without user initiation since the wireless transmitter is able to detect most falls and automatically contact the call center.
- Monitoring and tracking level of activity and sleep/wake patterns.
- Text messages and email alerts to the Caregiver(s).
- 24/7 call center monitoring support.
- User friendly, easy-to-read, and private web portal interface for the myHalo User and/or the Caregiver(s).

WHY MYHALO?

- 40% of all seniors over 65 will fall this year
- Falls are the #1 cause of death among seniors
- 4 out of 5 seniors who use a traditional manual medical alarm with a panic button are unable to push the button after a fall
- Manual medical alarms do not provide seniors living alone with the necessary protection

HM120010021

myHalo Complete

Alarms & Alerts

IDEAL FOR DEAF OR HARD OF HEARING INDIVIDUALS, THESE SYSTEMS REPEAT AN ALARM OR ALERT WITH LIGHTS, AMPLIFIED SOUNDS AND EVEN MOTION. THEY ARE BOTH CONVENIENT AND LIFE SAVING!

Krown Wireless Alarm Monitoring System

The Krown Wireless Alarm Monitoring System is designed to bridge the gap between existing warning devices designed for those without a hearing loss. The system provides a complete reliable source for deaf and hard of hearing individuals to be alerted during emergency situations.

It connects up to three audible alarms such as fire/smoke alarms, carbon monoxide alarms, home security systems, weather alerts and any other audible alarm into one monitoring system.

It's the first flexible alarm monitoring system on the market designed to fit small, medium or large scale buildings.

KMK300

Includes Alert Receiver (with strobe and amplified alarm), wireless transmitter, and bed shaker.

MAILCHIME

No more wondering if the mail is gone and no more wasted trips to the mailbox. Simply mount the sensor on your mailbox door and plug the receiver into an electrical outlet in your home.

HP1200

Amplicom Digital Alarm Clock

The Amplicom Digital alarm clock includes voice output, an extra-loud signal, ultra-bright light signal and cordless vibrating pad.

- Dual alarm time setting
- Connect phone line to use as a ring signaler
- Adjustable volume

AM93435

NuTone Wireless Chime Kit with Strobe

Mount the pushbutton/transmitter outside and plug the receiver into a convenient wall outlet inside (up to 100' away) and it's ready for use. The pushbutton/transmitter can be programmed to sound one of three chime sounds.

NULA204WH

LifeTone

The LifeTone HL Bedside Fire Alarm and Clock features smoke alarm technology that could save your life in a nighttime fire. This state-of-the-art bedside fire alarm system is specifically designed to be effective and safe in waking people up - and it's affordable too!

- Uses the alarms proven in research sponsored by the US Fire Administration as most effective for waking people
- Works with your existing working smoke alarms - no installation, no wiring required
- Needs nothing but a power outlet; plug it in, run it through a quick test to synchronize it with your smoke alarms, and it's instantly on duty
- Battery backup lasts 7 days or more while still providing emergency alarm signals
- Big, easy-to-read display also alerts you if there is a power outage
- Can be used as daily alarm clock (the wake-up alarm is at a lower, non-emergency volume)
- Comes with the optional bed shaker for added protection

LTHL150

UNATTENDED COOKING IS A TOP CAUSE OF FIRES IN RESIDENCES. PREVENT YOUR LOVED ONES FROM BEING PART OF THE STATISTICS.

CookStop

CookStop continuously checks for movement in the kitchen. If the resident leaves the room, or falls asleep, CookStop shuts the stove off.

Is an unattended pan heating on a stove in a residential unit you manage - right now? Is someone asleep with the stove on? Did they get distracted talking on their cell phone and step away from cooking? CookStop can be watching for you - and shut down that fire risk!

CookStop is a proactive solution, stopping the cause of the fire. Smoke detectors, alarms and sprinklers are reactive solutions - by the time they activate, smoke, flames, and risk are already present.

CSW3W

STOP A FLOOD BEFORE IT STARTS

Cross Point Wireless Sensor Pads - With Voice Alert

Cross Point has introduced two new sensing systems, built on their very popular Voice Alert System. This new line of products are helpful for caregivers of residents with Alzheimer's and other forms of dementia to provide notification when a resident needs help or is inclined to wander.

The system has three components: **The sensor is connected to a Voice Alert wireless transmitter box, that sends a radio signal to a Voice Alert receiver located up to 300' away.**

Sensor Pads: The Cross Point Wireless

Sensor Pad*
CIVA122

Incontinence Pad
CIVA1322

Sensor Pads are used to notify caregivers when a resident needs assistance or enters a restricted area. They are used by residents who are bed-ridden, in a wheelchair or suffer from various forms and degrees of dementia. The pads trigger a wireless signal that plays at a Voice Alert receiver in the home or facility notifying a caregiver that a resident needs help.

Incontinence Pads: The Cross Point Incontinence Sensor Pad mounts under bed sheets or under a light cloth on a chair to notify a caregiver when a resident has wet.

* Sensor pads available in multiple sizes, for wheelchairs, toilets and beds.

Wander Alerts

CARE FACILITIES APPRECIATE THE FREEDOM FOR STAFF TO MOVE ABOUT AND STILL BE ABLE TO MONITOR PATIENTS WITH A TENDENCY TO WANDER.

Multi-Resident Wanderer Alert

The EM-900WA Wanderer Alert monitors up to 40 residents who wear a transmitter as a pendant or bracelet on a wrist or ankle. When the person wearing the alert device wanders a selectable distance from the unit, Short (50') or Long (500') the alarm sounds!

It's portable, allowing continuous monitoring while away from the work station. The transmitters continuously send signals to the Wanderer Alert Monitoring station. Whenever residents wander away or move outside areas or facilities, the signals are no longer received from the transmitter. The Wanderer Alert detects the missing signals and sounds the alarm.

The LCD displays the person's name, location, etc. received from the transmitters. Staff can quickly respond to the emergency.

USEM900WA

**Wanderer Alert Pendant
USWPT900**

Can be used as a pendant, or bracelet, worn around the neck, wrist or ankle.

Single-Resident Wanderer Alert

Using a wireless pendant to signal to the Wanderer Alert, the Wanderer Alert unit sounds the horn/strobe alarm and/or dials a phone, cell or pager when the patient wanders away.

USWA900

EXIT ALERT

The Exit Alert detects patients attempts to exit homes or facilities and immediately sends signal to the Enunciator, horn/strobe unit alerting staff of patient's attempt to exit.

The Battery operated, wireless Sensor Mat/Transmitter Unit can be mounted Inside or Outside of Door or Window. Caretakers are able to enter and exit by switching the unit on and off without tripping the alarm.

The Exit Alert system can even notify you when the batteries are low!

USEEXP4

Personal Locator GPS Watch

Today, in our busy lives, it is one of our greatest fears that a loved one stray away and get lost. Lok8u's location-based watch functions as the ideal safety network, accurately and quickly identifying a person's location.

Lok8u uses state-of-the-art positioning technology and has its own cell ID algorithm that gives an approximate location within 10'.

The benefit of using dual locating technology is that a family member can still be located in instances where normal GPS may not be sufficient. This unique feature allows indoor and outdoor positioning.

Know where they are: Simply connect to the lok8u customer portal from your PC or text message from your mobile phone to locate your child, anytime, anywhere.

Instant alerts if removed: If the strap of your child's nu.m8 Plus is opened without your authority, an immediate alert is sent via SMS and email to warn you this has happened

Set your own boundaries: The "Safe Zone" feature allows you to easily set your own defined area by time and day. An immediate alert is sent via SMS and email to inform you if your child strays outside this area.

LKLOC8UX

Monitoring service required.
